ERROR The latest version of RSLogix 5000 supports the following Design Studio versions: 5,6,7,8,9 and 10. You are using version 5. Also, you are trying to use the RSLogix 5000 Designer with the RSLogix 5000 version 20.x. This software is no longer supported. Fatal Error Processing EDS File rslogix 5000 v20.01 for sensors running the 5.X firmware. Create and add an EDS module in RSlogix5000. EDS files are installed with Insight Explorer software RSLogix 5000 v20.01 Fatal Error Processing ED. RSlogix 5000 v20.01 Fatal Error L5X) for Project File of Later Version of RSLogix 5000 Software than is Being Exec. Copying Instructions To V20 From Earlier Version. In this case, you need to identify the exact version of the Design Studio that you are using. Since the EDS file has an extension ".Lgx00200903", you can find the Designer version by opening the file in an editor. From the Home Page of the Publisher – RSLogix Are the model numbers and firmware versions correct? Make sure that you know the model number and the software version that you are using. The following table indicates the supported Design Studio versions and associated firmware versions. If you have any additional information that might be helpful in this issue, then we would appreciate your feedback. Thank you, the RSLogix Development Team There are several reasons for "Fatal Error Processing ED. Lgx00200539", usually when a system is in "one or more controllers may not be responding" mode. And you can't place the failed hardware into the defective slot. By doing so, it may result in system fault. Please tell me a way to make it work. Thank you for your answer. As this is my first controller which I have used. Can you suggest what should I do first to get rid of this problem? RSLogix 5000 v20.01 Fatal Error..... rslogix 5000 v20.01 Fatal Error Solution for Fatal Error Processing EDS File in RSLogix 5000 v20.01.....
